# REFLECTION

LOOKING BENEATH THE SURFACE

## 'See yourself as you really are'

Dalai Lama

This many-faceted response to the idea of reflection will offer visitors a personal quest as they walk around the Cathedral by considering how reflection, in all its different meanings, affects them.

The exhibition will explore reflection and distortion in a number of ways using mirrors, reflective surfaces, multiple reflections, sound and music to express metaphors of reflection, self-reflection and contemplation.

- A music festival with a full programme of concerts and recitals
- Interactive pilgrimages, meditations, talks and worship
- Group visits for schools, parishes, WIs, community and arts groups etc.
